ABOUT ME

Computer Science student interested in Web Application and Full Stack Development. Experienced in using technologies for both frontend and backend web development, including Next.js, Node.js, and Express.js. Skilled in managing databases such as PostgreSQL and MySQL, as well as using tools like Git, GitHub, and Docker. Eager to continuously learn and improve technical skills to grow as a Software Developer.

TECHNOLOGY SKILLS

Programming Lanuages: Python, HTML, Java, JavaScript, CSS, Dart
Framwork & Libraries: Node.js, Next.js, Express.js, Tailwind, Bootstrap, React
Database: MySQL, PostgreSQL
Tools: Git, GitHub, Docker
System: Window sever

SOFT SKILLS

Problem Solving | Teamwork | Communication | Fast Learner | Adaptability

PROJECTS

Thesis: Web Application for Financial Integrity Learning among Students **Nov 2025 - Present**

Overview:

Designed and developed a web application to promote financial integrity learning among university students by applying Gamification concepts to increase user engagement and track learning outcomes through dashboards and online assessment systems.

Key Responsibilities & Features:

- Developed the frontend using React and Tailwind CSS
- Built RESTful APIs using Node.js and Express.js
- Designed and managed PostgreSQL databases
- Implemented authentication systems and password encryption using bcrypt
- Developed Gamification-based learning activities and Pre-test / Post-test systems
- Created dashboards for data analysis and user statistics visualization
- Tested APIs using Postman and managed version control with GitHub

Personal Project: AI Travel Planning Chatbot with AI Agent Integration **Nov 2025 - Feb 2026**

Overview:

Developed an AI-powered travel planning chatbot for Northern Thailand using AI Agents integrated with Google ADK and Gemini API to analyze user requests, generate automated travel plans, and connect with LINE OA and Notion for trip data management.

Key Responsibilities & Features:

- Developed AI Agents using Google ADK for analyzing and responding to user requests
- Integrated LINE Messaging API to build a chatbot system on LINE OA
- Developed an automated trip planning system with travel recommendations, restaurant suggestions, and budget estimation
- Connected Notion API for automatic travel plan storage and management
- Utilized MCP (Model Context Protocol) for weather data retrieval and external tool integration
- Designed async session management and AI Agent workflow systems
- Implemented error handling and logging systems for monitoring and debugging

EDUCATION

Bachelor's Degree in Computer Science, Faculty of Science, Naresuan University

2023 - Present
